

STEAMING-HOT STYLE

Italians are known for being market leaders when it comes to fashion and design, and the 3N1 Multitap from InSinkErator is no exception. Coming in matt black with chrome finishes, and three different striking designs to suit kitchens ranging in style from contemporary to country, the 3N1 is sure to have a look that you will love. Not only that, but thanks to an augmented reality app, you can picture the tap in your own kitchen, allowing you to get the look that's right for you.

But this stunning piece of tapware is more than just another way to add style to your room. The InSinkErator delivers steaming-hot water in a flash. This function is delivered thanks to the Neotank, a 2.5L tank that allows you to heat only what you need while conserving energy. You can receive water at temperatures of up to 98 degrees Celsius from the tank – that is as much as 20 per cent more energy efficient than a kettle, saving you both time and money.

Of course, the benefits don't stop there. You can also use the same tap to receive regular cool and hot water, meaning you get to enjoy the functionality of this Italian beauty without compromising when it comes to style and

benchtop clutter. There is also a push-lever safety-locking mechanism to ensure there are no kitchen accidents or burns.

In a world where time is one of our biggest commodities, it makes sense to invest in a system such as the 3N1 Multitap from InSinkErator. Not only will it make you more efficient, it will look good while doing so – what's not to love about that?
