SOME LIKE IT HOT

Instant steaming hot water at the flick of a lever — now that's convenient

Multitap3N1™ is a high-end, Italian-designed and -manufactured range of tapware for those who want style and convenience in equal measure. A standard kitchen mixer tap with the added functionality of steaming hot water, the Multitap3N1™ comes in two colours — matt black and chrome — and three different shapes, ensuring a look to suit all kitchen styles.

The tank boasts a revolutionary design, which means that all the heat it generates is released through the tap itself. Another standout feature is the safety lock mechanism on the steaming hot water lever.

Offering the convenience of instant steaming-hot water at the flick of a lever, the Multitap3N1™ can be used for endless applications that will save you time in the kitchen. These include:

- Making tea and coffee
- Blanching vegetables
- Preparing noodles
- Preparing baby bottles
- Filling your hot water bottle before bed

- Cleaning (perfect for stubborn pots and pans or a quick kill of germs on your sponge)

And the benefits are just as extensive, including:

- No more waiting for the kettle to boil
- No waiting for water to run warm for washing up
- No need for a kettle, saving precious bench space
- The hot water tank is stylish and small — so small it can fit under most kitchen sinks

But back to the tank. The Multitap3N1™ is supported by the next-generation Neotank. The unit measures 310mm high x 157mm wide x 206mm deep, about the size of a toaster, and is designed to clip to the internal wall of your cupboard. This upgraded tank has precise adjustable temperature control up to 98°C — just turn the heat up or down, depending on your needs. What's more, the 2.5-litre capacity allows you to heat only what you need while conserving energy, and it's very quiet too!

To learn more about The Multitap3N1™ and its myriad benefits, view the specifications or locate your nearest stockist, check out the informative Multitap website.
